Art Unit: 1761

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Earle et al (Food product development).

Earle et al disclose food product development comprising identifying a demographic group (e.g. culture, religion, country), identifying flavors familiar to the groups (e.g. wine, vegetables, cake), identifying a desired concept for product development (e.g. snack foods, sauce), using the knowledge obtained to develop a product for the selected demographic group (see pages 194-256 and 317-347, especially pages 213, 216, 221, 222, 224, 236, Tables 5.10, 5.13, and Figure 5.9).

The identification of flavor drivers is obvious to that of Earle et al as all attributes are considered in product development including descriptive sensory analysis (Tables 5.13 and 7.6).

It is obvious to use well-known product development techniques to do no more than yield predictable results.

Applicant's arguments filed June 29, 2007 have been fully considered but they are not persuasive.

Application/Control Number: 10/811,003

Art Unit: 1761

Applicant argues that Earle et al teach a top-down approach while the claimed invention is a bottom-up approach, and that Earle et al do not teach the identification of

a demographic group.

The order of events is seen to be no more than a matter of choice and well-within the skill of the art. Applicant states on page 14, lines 16-18, of the specification, that "specific sequential order need not be followed." Earle et al identify a demographic group based on culture, religion, country etc (see page 213).

Applicant is using well-known product development techniques to obtain no more than expected results.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
